NEWS RELEASE

WILMINGTON, Del. (October 27, 2010) – The Technology Forum of Delaware is proud to announce its November educational event, “Redeploying the Chrysler Site and Regional Translational Medicine,” in cooperation with Delaware Technology Park, scheduled for Wednesday, November 17 from 5:30-8:30 PM at Harry’s Savoy Grill, 2020 Naamans Road in North Wilmington.

Have you heard about the plans for the former Chrysler site in Newark, now repurposed as the UD Science and Technology Campus? Learn about Delaware Health Sciences Alliance (DHSA), a regional consortium of health science and educational institutions: what is it already doing, how might it impact me, my health, my family, my company?

Join us November 17th and see and hear about the exciting future in the region with translational medicine and the redeployment of a former automotive plant.

Mike Bowman, Chairman and CEO of the Delaware Technology Park and Technology Forum of Delaware Board Member will open the evening with an overview of the University of Delaware’s Science and Technology Campus (former Chrysler site in Newark). This 272 acre site purchased by the University is a key component in the university’s Path to Prominence initiative. The property will allow the expansion of university based research and development undertaken with corporate, government and other research organization collaborations.

Dean Kathy Matt, University of Delaware Health Sciences and Executive Director of the Delaware Health Sciences Alliance, a partnership with Christiana Care, Nemours, Thomas Jefferson and the University of Delaware, will update the Technology Forum of Delaware audience with the college’s and the alliance’s vision, plans, desired partnerships with industry and intended outcomes in the region.

Previous TechForum DE events have attracted over 100 individuals providing for great networking.

The cost is \$25 for members of TechForum DE, and \$40 for non-members.

Redeploying the Chrysler Site and Regional Translational Medicine event is sponsored by Delaware Technology Park, the next evolution of Delaware's science-based growth.
